PATHWAY SUPPORT STRUCTURES

MODULAR DATA CENTER STRUCTURES

Welcome to ADVANCED AISLE™, the better way to build containment/pathway infrastructure. Using pre-engineered and easy-install components, we build scalable structures that employ weight-bearing engineering features that eliminate the need for costly structural, grid, or roof support systems. We also pre-fabricate your entire containment structure at our factory to facilitate rapid on-site deployment by our installation team, saving you valuable time and money. At NDS, our engineers will custom-design your build to fit any site configuration and deliver on-target solutions that meet your needs.

- 4 Rapidly Scalable Data Center Infrastructures
- 6 POD Structures
- 8 Fan Wall Return Plenums
- 10 Installed Pathway Support Structures

ADVANCED AISLE™ PATHWAY SUPPORT STRUCTURES

RAPIDLY SCALABLE DATA CENTER INFRASTRUCTURES

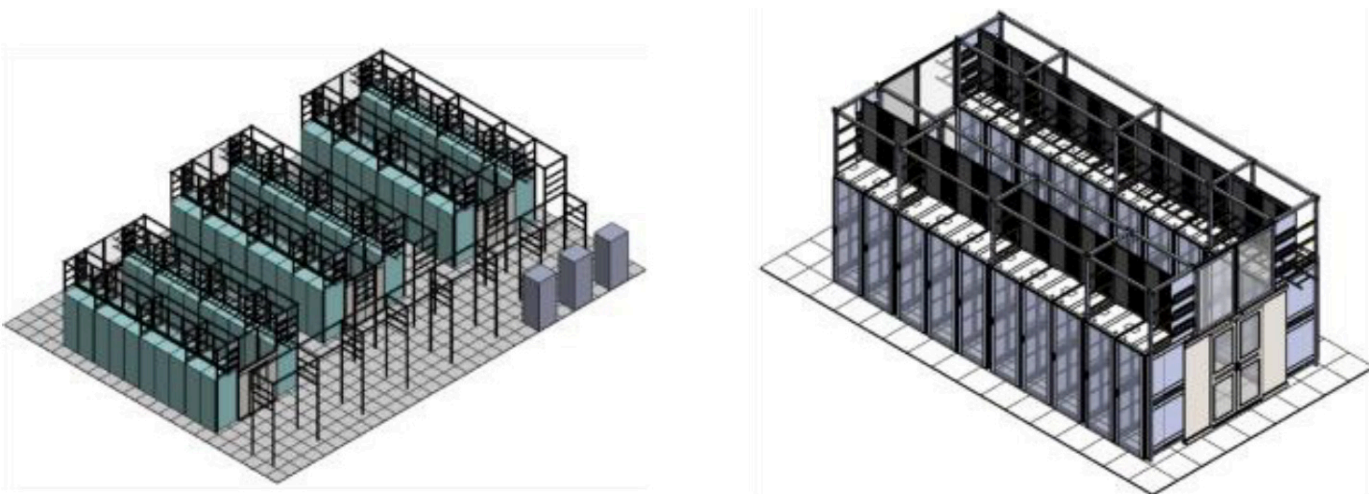

**NUCOR DATA SYSTEM'S SUPPORT STRUCTURES
OFFER SCALABLE, BUDGET FRIENDLY SOLUTIONS
THAT CAN BE SEAMLESSLY DEPLOYED**

NDS' ADVANCE AISLE™ Support Structure System provides the most cost effective, easy to implement and site friendly total approach to the traditional "cabinet-containment-pathway" step-by-step implementation by using a modular, expandable, self-supporting support structure system.

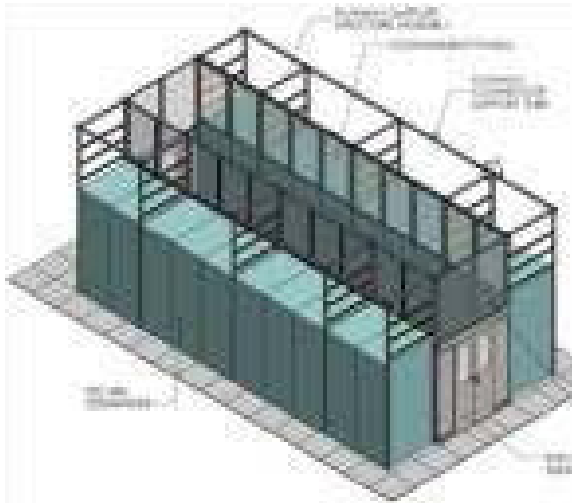

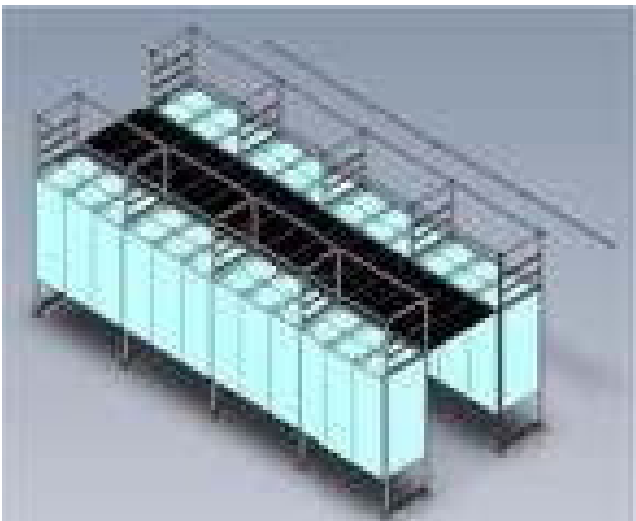

With NDS's modular approach, we pre-fabricate the entire structure, containment and pathways at our factory and assemble on-site. This modular approach allows for a tremendous labor cost savings over the traditional methods.

We can custom design solutions to fit any site and you get the fastest solution without "premium" costs.

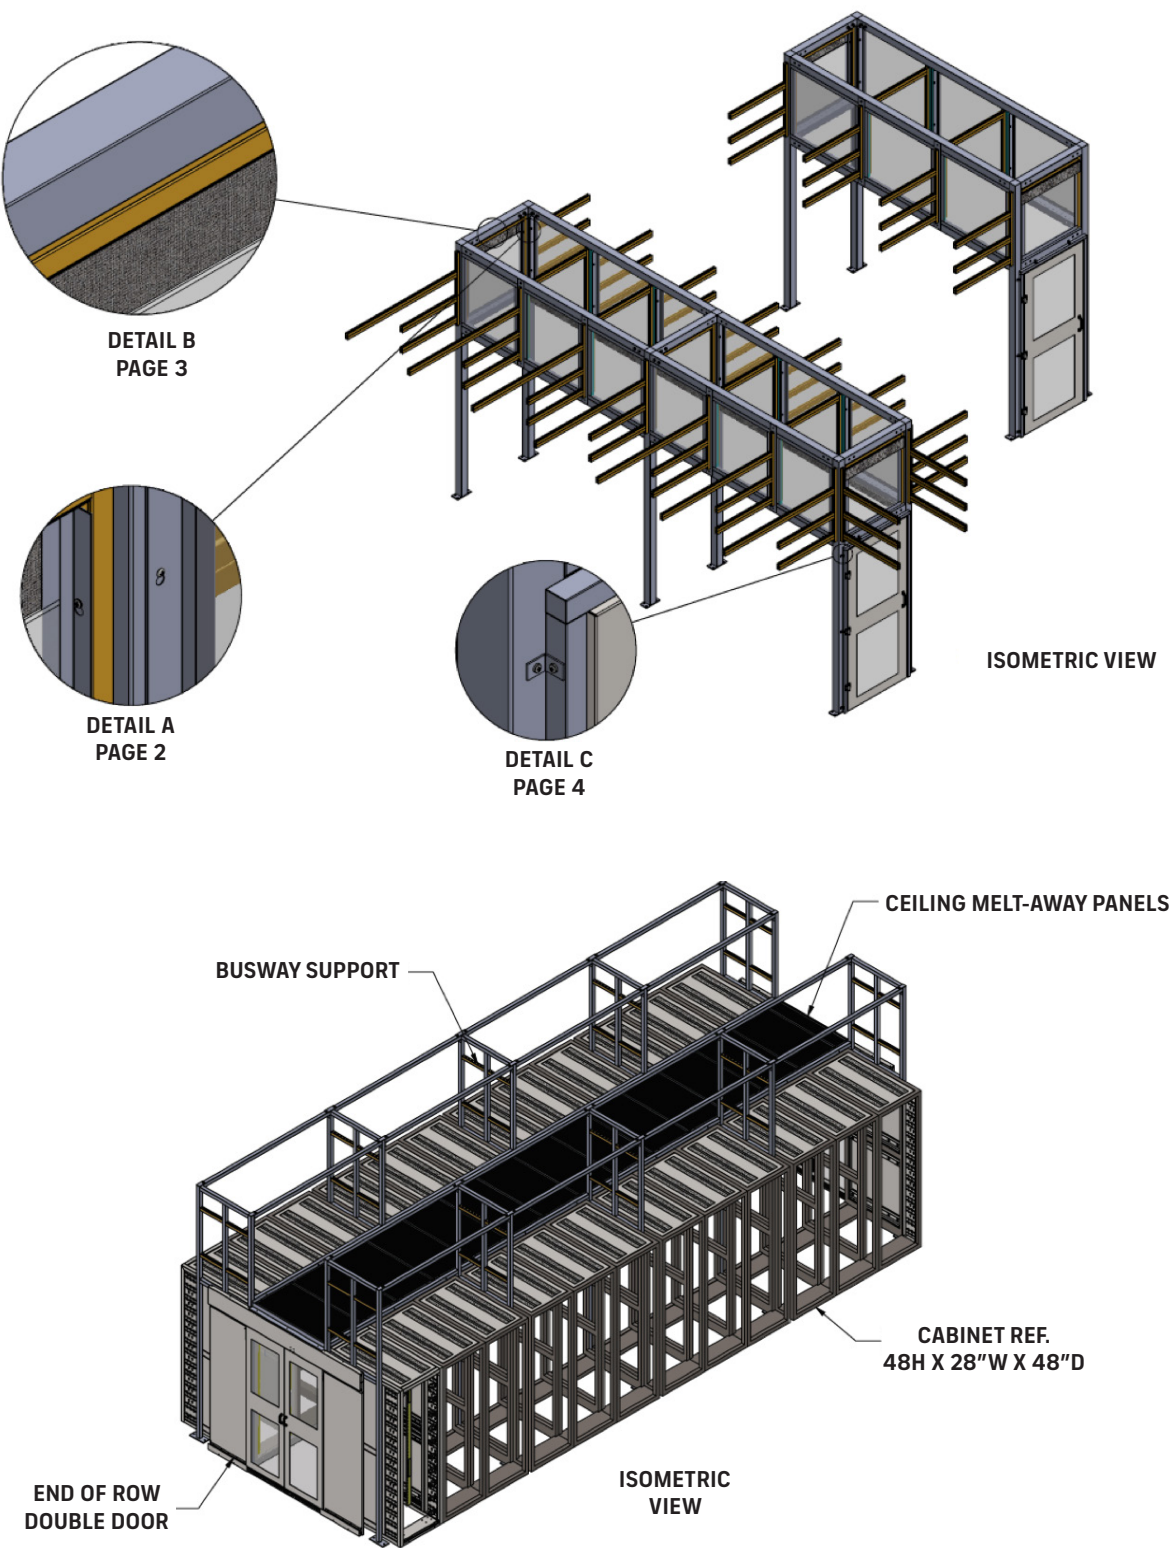

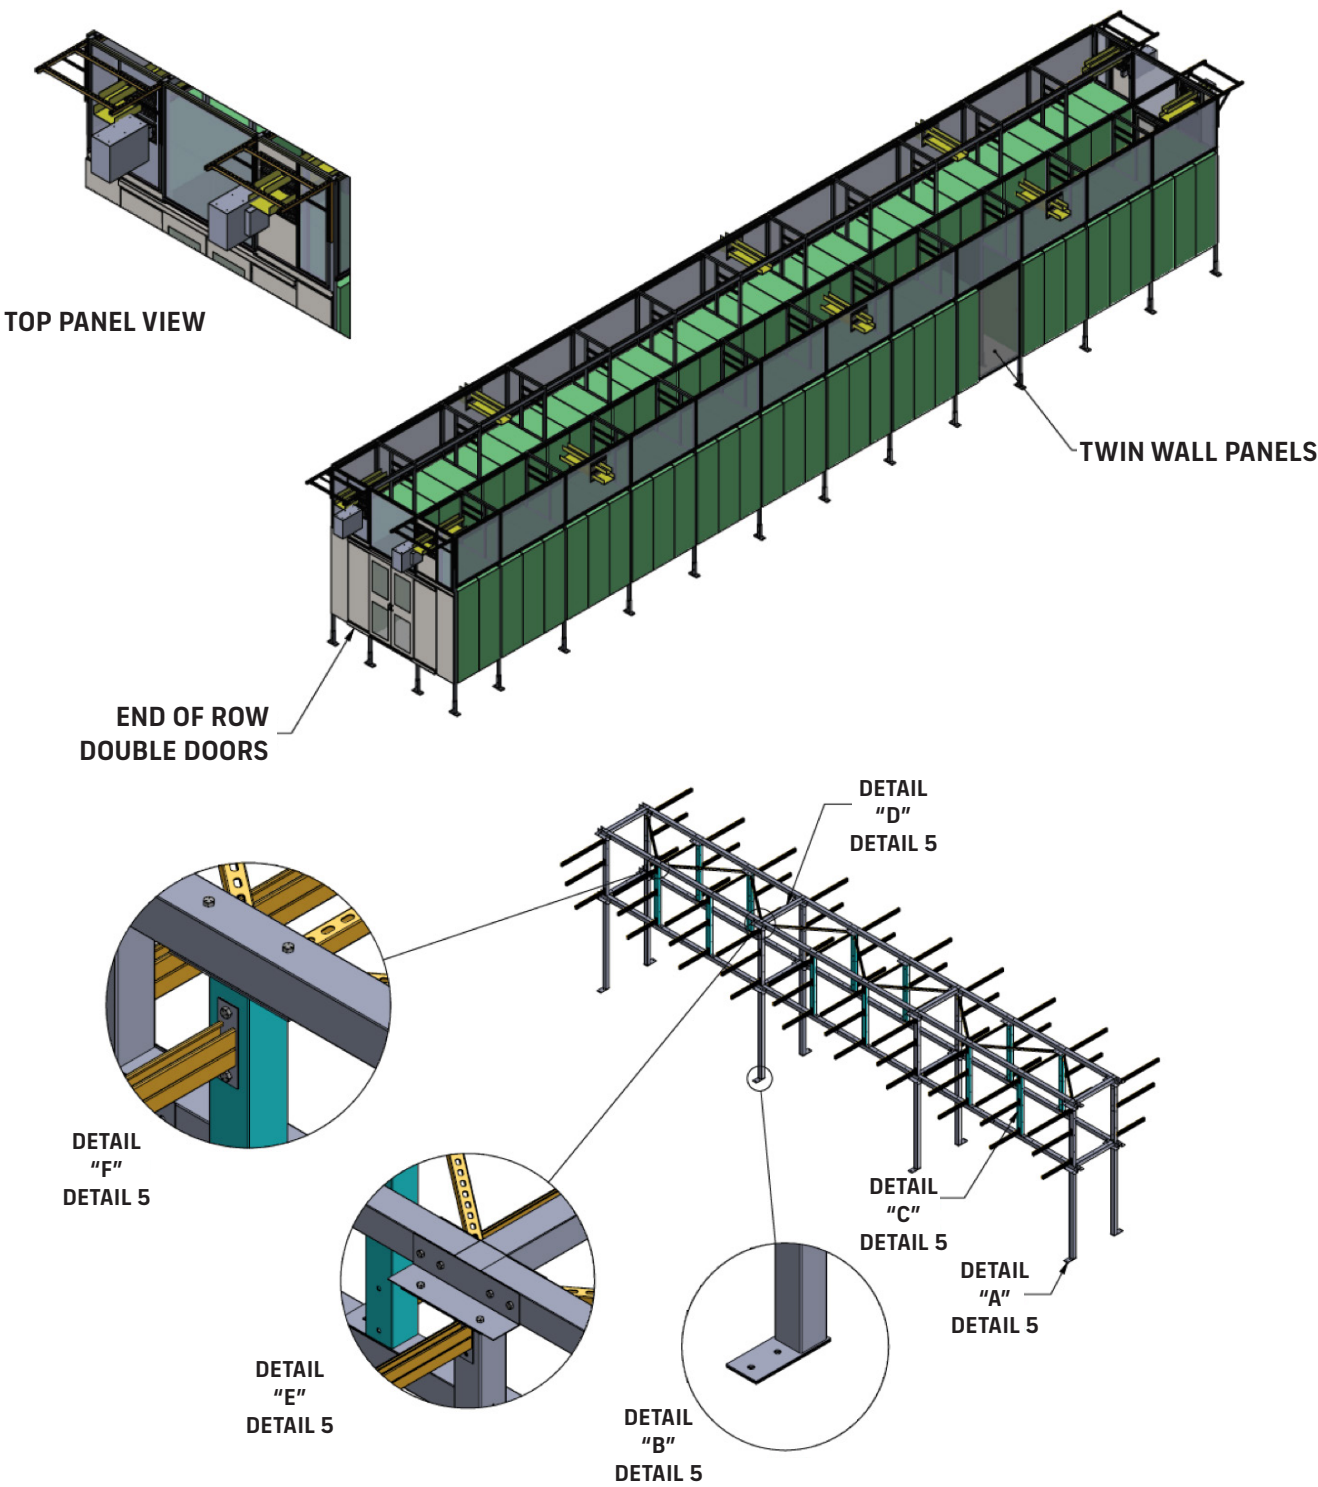

FEATURES

- Integrated Hot or Cold Aisle Containment systems
- Self-supporting structures tie into the floor only with no roof load
- Typical 75% cost savings over traditional systems
- Typical ROI of 12 months or less vs. traditional methods
- Completely scalable and changeable in-center to meet any expansion or demand
- Replicable designs can be implemented across multiple facilities
- Accommodates "Rack & Roll" cabinet implementation process
- Hot aisle to plenum lightweight cabinet supported vertical panels speed installation
- Rapid manufacturing times ensure availability that fits your needs
