ADVANCED AISLE™
SLANT CAP®
CONTAINMENT SYSTEM

Designed for large measurable air separation impact, with easy, rapid installation, and no sprinkler placement change to facilities.

High energy costs and accelerated energy consumption has forced data center managers to implement strategies to achieve separation between the hot and cold air in the data center.

NDS' ADVANCED AISLE™ Containment System provides the most cost effective, easy to implement and site-friendly total approach to achieve this positive separation in existing (retrofit) or new data center builds.

Our comprehensive engineering approach reduces acquisition and installation costs while providing effective solutions. We can quickly and efficiently custom design solutions to fit any site, while minimizing cost.
